The Immergas CAR V2 modulating remote control has been designed to guarantee ideal temperature conditions at any time of the day and night for each individual day of the week. Only a few minutes are required for installation: it is connected to the boiler by just 2 cables, through which, it receives and sends the adjustment and control commands and receives the power supply. On completion of installation it is ready to function thanks to the pre-set program inside. Users can modify the basic program according to their lifestyle to guarantee optimal tailored comfort. Programming of the CAR V2 remote control is extremely easy and a wide display allows constant control of all values set.
