

UPONOR SMATRIX UNDERFLOOR HEATING CONTROLS

MANUFACTURED BY:

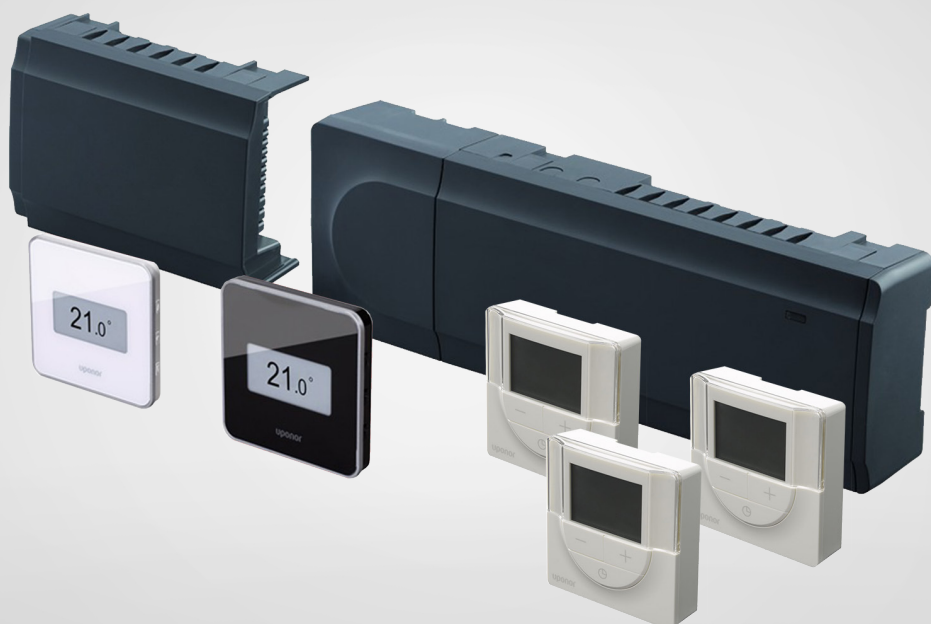

uponor

Uponor Smatrix is a management system for underfloor heating and cooling installations. The Smatrix control system allows the user to easily control the temperature of each individual room/zone.

Smatrix consists of a controller, thermostats and actuators. The controller manages the operation of the actuators when the thermostats detect a demand for heating and cooling.

**12 MONTH*
WARRANTY**

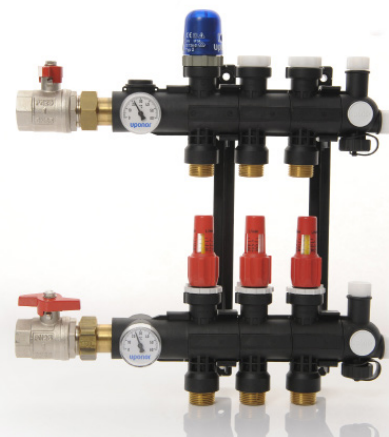

Features & Benefits

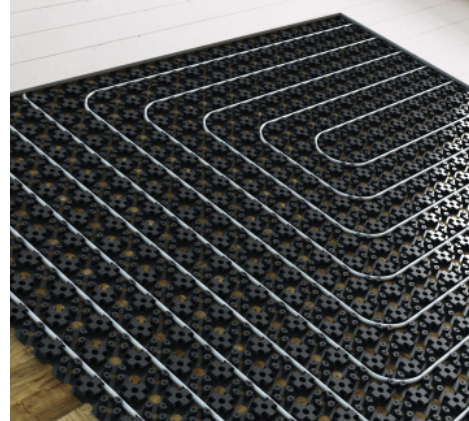

- Easy and fast to install and set up with minimal wiring
- Suitable for heating and cooling installations
- Flexibility due to modular system architecture
- Low maintenance with no batteries required
- Indoor climate control including humidity control
- Ideal temperature guaranteed for all seasons
- Black and white thermostats available

HUNT HEATING
The smart choice.
